Fight Fire With Fire
In Fight Fire With Fire, David Horowitz looks back to his past as a “red diaper” baby whose parents were members of the American Community Party and sees a forecast of today’s politics. Today’s left, which occupies the Oval Office rather than being restricted to the political ghetto in which Communist Party members once resided, follows the same duplicitous concealment of motives as its predecessor. As Horowitz writes, “This camouflage is very old. In my youth, I never once heard my parents or their party friends refer to themselves as Communists. They were progressives” and registered Democrats. After surveying the contemporary scene, he goes on to ask, “What is liberal about these people of the left, except their attitude towards hard drugs, six and criminal behavior? Oh yes, and spending other people’s money?” This pamphlet is a searing indictment of a radical left, in power in the White House and in our popular culture, that is always trying to cover its spots by claiming merely to be liberal. But it is something more as well—a how to manual for conservatives who are dismayed at the state of the union and anxious to turn back the leftist tide. Horowitz’s prescription? Conservatives need to talk less to voters heads and more to their hearts, less about budgets and more about the suffering progressive programs cause. Conservatives need to speak as champions of the underdogs whose lives are being steadily constricted by the ongoing destruction of a system that once afforded more opportunity for more people than any other in the history of the world. Part j’accuse; part expose of the left’s brutal oppression of the racial minorities it works so hard to keep on its electoral plantation; part prescription for a change of heart on the part of conservatives. Fight Fire With Fire presents a vision of how to combat the radical left that is turning America into a country we no longer recognize as our own.
Customer Reviews

This is another, short Kindle book that can be read in a single, short sitting but its contents are important because they deal with the current struggles between the ultra-leftists and the conservatives, not necessarily on the far right with the Tea Party. The author is very well known, having written countless books and primers, such as this one, and heading up an organization in CA known as the Freedom Center. The number of very clever authors and writers that David Horowitz has assembled within his organization is very impressive, and many of them have written similar Kindle books that you can find on, such as those by Robert Spencer, also very illuminating and impressive works. However, i digress. This particular book deals with Horowitz’s estimation of the threats existing today to the future of the USA because of its current, Democratic administration and their ultra-liberal and ultra-leftist politics and way of controlling government. This is not fictional, it is factual, and substantiated by Horowitz with suitable references to other articles. Not only does he describe the threat we now face but also, how we can fight fire with fire, and how the more conservatives amongst us can counter the ultra-leftists ready to give away America to certain others within its borders. The book has to do with the redistribution of wealth in America, reducing the disparity in incomes, forcing the more wealthy to subsidize the poorer section, and, in general, turning America into a much more, socialistic and leftist entity. It is also about losing our constitutional rights and freedoms, which the author also sees on the horizon unless we act now. This is what he means about fighting fire with fire but you will have to actually read the book to learn more.
