This is Rovin's companion piece to his "Encyclopedia of Superheroes", and is every bit as well researched. Try to think up the most obscure comic book or TV serial supervillain--he or she is in here. If I had to find a quibble, it's that this book includes the nemeses of superheroes that were not listed in the former book; for example, you'll find entries for the Master, but Doctor Who was not in TEOSH. A must own for comic book, SF, and adventure film/TV buffs alike.

Great information resource for character research. While I don't like all the stickers on the cover or the tape to keep it in place (I realize this is something libraries do, but I wish they would remove it all and clean the books up before giving them up for selling), it is still in good condition and makes for a good replacement for my original copy.

This companion piece to Rovin's Encyclopedia of Super Heroes is a great research tool for pop culture scholars. The problem with this volume as opposed to the original is that it seems less complete. And some omissions are quite striking. For instance, there are listings for several Doc Savage villains like Carl Zolg and General Ino, but there is no listing for John Sunlight (the only pulp

villian to match wits with the "man of bronze" more than once). There's also no listing for the Shadow's arch-foe Shiwan Khan. Still I guess this is a minor quibble. After all, how can you find too much fault with a book that has a listing for Mighty Mouse's arch-enemy Oil Can Harry?
