Does Anything Eat Wasps?: And 101 Other Unsettling, Witty Answers To Questions You Never Thought You Wanted To Ask

Synopsis

How fat do you have to be to become bulletproof? Why do people have eyebrows? Why do pineapples have spines? How much does a head weigh? What affects the color of earwax? How quickly could I turn into a fossil? Have you ever thought up a question so completely off-the-wall, so seemingly ridiculous, that you couldn't even find the courage to ask it? Maybe at the sports bar you were transported by the beauty of your beer to wonder, "How long could I live on beer alone?" Or, cycling through the park, you mused, "Did nature invent any wheels?" Or looking up at the night sky, you had a moment of angst, "What would happen if the moon suddenly disappeared -- if it were vaporized or stolen by aliens?" Full of fun factlets, *Does Anything Eat Wasps?* is a runaway bestseller around the world. It celebrates the weird and wacky questions -- some trivial, some baffling, all unique -- and their multiple answers culled from "The Last Word," a long-running column in the internationally popular science magazine, *New Scientist*. Tackling the imponderables of everyday life, sparkling with humor, and bursting with delightful erudition, *Does Anything Eat Wasps?* is irresistibly entertaining and utterly engrossing. So, go on. Put away your lab coat and your pencil -- science is fun again.

Book Information

Paperback: 211 pages

Publisher: Atria Books (April 5, 2006)

Language: English

ISBN-10: 0743297261

ISBN-13: 978-0743297264

Product Dimensions: 5.5 x 0.7 x 8.4 inches

Customer Reviews

There are many informative interesting fact books out there, what makes this one different from the rest is that they haven't actually gone and found experts to find out what the actual answers are, instead readers of popular magazine *NewScientist* (and granted some of these are scientists, lecturers and others who would know what they are talking about, but a lot are just every day people

as well) have answered questions pondered by other readers. This book is a collection of a column that appears in each addition of the magazine. So it is comparable to logging onto a forum on Yahoo or somewhere else where questions are posted by one users for anyone else to answer, the answerer may be 100 per cent right then again the again they may be a hundred percent wrong. You could also compare this book to when researching a fact going online to Wikipedia where anything can be posted as fact, instead of looking up an actual encyclopaedia or specific topic research book. If you like visiting these types of websites, and can take every answer with a grain of salt as they say, then this may well be the book for you. If you actually want answers you know are true to interesting questions or books of facts then there are far better alternatives out there such as *Do Blue Bedsheets Bring Babies?: The Truth Behind Old Wives' Tales*,
